

EVM-CR

Earned Value Management Central Repository

21.4 December Release Items

12/8/2021

1 Summary

Below are the included items in the October Release of the API, Auth, CR, External API, NG, Portal, and Web Services applications.

- Updated inconsistent references to “Mil Handbook”, “Military Handbook”, “Commodity Group”, “Mil Standard” all to “Commodity”.
- Adjusted the Export file templates to Freeze the header rows.
- Updated the Report Data Quality page to fix some minor bugs, improve usability and design.
- Updated the View Data Quality page to fix some minor bugs, improve usability.
- Fixed label on Reviewers and Submitters tab which incorrectly displayed the Reviewer NDA status.
- Added non-support Internet Explorer warning on login page.
- Added Actions to data grid of POT chart, which includes link to source file and option to add a Data Quality ticket.
- Added new streamlined version of Client Management page for API approvals.
- Updated NuGet packages.
- Numerous bug fixes in the CR, Portal, and NG applications.

2 Site Changes

The primary changes in this release were related to updates to the charting pages in the NG application, and the calls associated to them. There were several other bug fixes associated with the CR and Portal applications, as well. We also instituted a new version of the Client Management page for Administrative users, to simplify the approval process of these API users. We also continued our effort to maintain a consistently updated application by staying on course with updating the NuGet packages and other libraries.

API

Data Views and Charts Tab loading optimization to decrease load time.

Fixed subcontractor bug in API call.

Added new API call for individual report period details.

Refactored the API calls so the naming conventions were more universal.

Auth

Added new streamlined version of Client Management page for API approvals.

Added non-support Internet Explorer warning on login page.

CR

Fixed JavaScript bug which prevented comments and report links to work properly in RCR.

Fixed Reporting Stream display bug.

Fixed RCR refresh issue on Comment grid.

Updated NuGet packages.

Updated the Report Data Quality page to fix some minor bugs and improve usability.

Updated the View Data Quality page to fix some minor bugs and improve usability.
Replaced (Mil Handbook, Military Handbook, Commodity Group, Mil Standard) all to show as Commodity.
Adjusted the Export file templates to Freeze the header rows.
Updated the Level 1 Portfolio UI and Export ordering of columns.
Fixed a display issue on Submission Detail after publishing.
Fixed label on Reviewers and Submitters tab which incorrectly displayed the Reviewer did not have an NDA when he or she did.

External API

Updated NuGet packages.

NG

Updated Font Awesome to match .NET applications.
Added option to add a Data Quality ticket from the chart table (POT).
Added new range options for rendering time-index chart data.
Added new modal for display of an individual Reporting Period source.
Adjusted help desk admin list to not show duplicates.
Adjusted the program autocomplete list on the help desk page. The DDL should list all, but the button should list those that are individual to the requestor.
Fixed several bugs in the new (not yet linked to) web service admin page in the ng application.
Fixed typo in tool tip of the POT chart.
Adjusted all exports to more closely match the .NET export files.
Fixed a bug in the Help Desk where the Effort ID was appearing instead of the Effort name.
Removed the Summary level from the EPC Chart.
Fixed filtering issue on WBS Elements, OBS Elements, and Staffing tabs.
Fixed a bug when redirecting to the charts page...the items were not showing at all if not data on that effort.
Adjusted the display of duplicated items in Contract Number DDL.
Fixed OBS Elements, Baseline, and Staffing tabs, were showing incorrectly if no elements were present.

Portal

Fixed numeric discrepancy on EVM Submissions for Review tile and grid.
Replaced (Mil Handbook, Military Handbook, Commodity Group, Mil Standard) all to show as Commodity.
Fixed a bug on Contract Details where the Inactive items were showing by default.
Updated NuGet packages.
Fixed some 508 Compliance issues on Contract Request page (disabled controls were nearly unreadable).

Web Services Admin

Updated NuGet packages.

Web Services Host

Updated NuGet packages.

3 DB Changes

There were changes made to the DCARCPortal, DCARCReporting, and EVM Databases.

- The changes made were all stored procedure and function call updates. There are no schema changes in this release.
